

Sendai Framework for Disaster Risk Reduction 2015-2030

WCDRR Ser

WCDRR Ser

WCDRR Sendai

***SENDAI
FRAMEWORK***

**Scope and
Purpose**

**1 Global
Outcome**

1 Goal

7 Global Targets

13 Guiding Principles

**4
Priorities
for Action**

at 4 Levels
Local, National, Regional and Global

**Role of
Stakeholders**

**International Cooperation
and Global Partnerships**

Innovations

- Shift from **disaster loss** to **disaster risk**
- Shift from disaster management to **disaster risk management**;
- Shift from “**what to do?**” to “**how to do?**”
- Focus on **people-centred** preventive approach to DRR
- **Primary responsibility of States for DRR**
- **Shared** responsibility for DRR with stakeholders
- **Scope** includes slow-onset, man-made and bio hazards;
- Set of global **targets**;
- Set of guiding **principles**;

Innovations

- Articulation of governance to manage disaster risk, including role of national platforms;
- Understanding, tackling disaster risk drivers;
- Preparedness to **“build back better”**;
- Strengthened accountability for disaster risk management;
- Recognition of stakeholders and their roles;
- Mobilization of risk-sensitive investment;
- GP and RPs for coherence, monitoring and periodic reviews;
- Resilience of health infrastructures, cultural heritage, and work places;

4 PRIORITIES FOR ACTION

Priority 1 Understanding disaster risk

Policies and practices for DRR should be based on an understanding of disaster risk in all its dimensions of vulnerability, capacity, exposure of persons and assets, hazard characteristics and the environment.

Priority 2 Strengthening disaster risk governance to manage disaster risk

Disaster risk governance at the national, regional and global levels is of great importance for an effective and efficient management of disaster risk.

Priority 3 Investing in disaster risk reduction for resilience

Public and private investment in DRR are essential to enhance the economic, social, health & cultural resilience of persons, communities, countries, their assets, as well as environment

Priority 4 Enhancing disaster preparedness for effective response, and to “Build Back Better” in recovery, rehabilitation and reconstruction

Strengthened disaster preparedness for response, recovery, rehabilitation and reconstruction are critical to build back better

National and local dimensions

Regional and global dimensions

Priority Four of Sendai Framework

Enhancing disaster preparedness for effective response and to “Build Back Better” in recovery, rehabilitation and reconstruction

The steady growth of disaster risk indicates the need to further strengthen disaster preparedness for response, take action in anticipation of events, integrate disaster risk reduction in response preparedness and that ensure capacities are in place for effective response and recovery at all levels.

Empowering women and persons with disabilities to publicly lead and promote gender equitable and universally accessible response, recovery rehabilitation and reconstruction approaches are key.

Disasters have demonstrated that the recovery, rehabilitation and reconstruction phase, which needs to be prepared ahead of the disaster, is a critical opportunity to build back better, including through integrating disaster risk reduction into development measures, making nations and communities resilient to disasters.

Build Back Better in Recovery

- ✓ *Prepared ahead of the disaster*
- ✓ *Capacities are in place for effective response and recovery*

National and local Levels

- *Promote the resilience of new and existing critical infrastructure (water, transportation, educational facilities, hospitals)*
- *Promotion of public awareness*
- *Plan and prepare for post-disaster recovery and reconstruction*
- *Promote of disaster risk management into post-disaster recovery and rehabilitation process*
- *Consider relocation of public facilities and infrastructure to areas outside the risk range*

Global and regional levels

To achieve this, it is important to: (d) Enhance international mechanisms, such as **the International Recovery Platform**, for the sharing of experience and learning among countries and all relevant stakeholders

Roles of and expectations to IRP

*Along with the New IRP Strategic Framework,
In the context of supporting the implementation of Priority Four of the
Sendai Framework,*

- ✓ As the principal platform for the sharing of experiences and learnings on build-back-better in recovery approaches,
- ✓ To identify and strengthen knowledge and information on build-back-better in recovery, rehabilitation, and reconstruction,
 - proactively contribute to the implementation of Priority Four of the Sendai Framework and lead discussions around the issue of build-back-better at international forums.
 - promote collaboration and cooperation among global and regional partners on the subject of build-back-better in recovery, rehabilitation and reconstruction.
 - promote shared understanding of a common strategic approach for build-back-better among IRP partners

er than managing disasters
n needs to be reinterpreted.

New risks have been generated faster than
existing risks have been reduced,

to consequences of disaster are
rarely attributed to
the decision that generates the risk.

progress has been limited
in managing such underlying risks.

Global capital flows have transformed
the landscape of disaster risk.

Investment decisions rarely take into
account the locations,

Thank you very much
